

VCARE: Manage Your Occupancy Limits in Real-time

Follow government social distancing restrictions on COVID-19 by tracking & managing incoming visitor traffic with digital screens, live-monitor your occupancy levels to keep your customers and staff safe, and optimize facility management for different zones to provide periodic sanitization for areas with the least traffic.

MONITOR OCCUPANCY & TRAFFIC IN REAL-TIME

Comply with government social distancing guidelines, and **let your customers know the safety of your space** by integrating occupancy data into your own application through API.

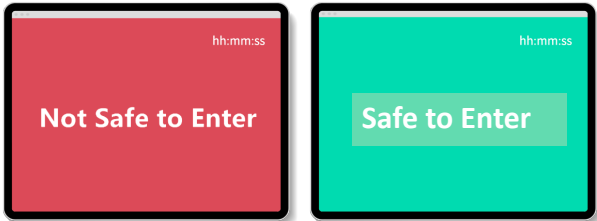

CUSTOM ZONE OCCUPANCY

Optimize your facility management per zone (toilets, food court, elevators, etc.) to **provide periodic sanitization for areas with the least traffic**. Understanding your occupancy per zone allows you to optimize your energy usage per zone.

DISPLAY OCCUPANCY RECOMMENDATIONS

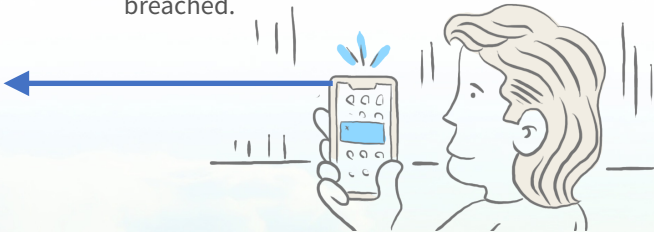

By installing digital screens at your entrances, you can coordinate the waiting times and safety of visitors and employees...
No Integration required. Plug & Play!
